

## **Sevim Aslan**

After her graduation in 1987 (İTÜ), she completed her MA at the Department of Restoration (İTÜ) with her advisor Professor Dr. Doğan Kuban. Her thesis entitled "The Structural Analysis of the Ancient City of Antalya – Perga, The Southern Turkish Bath."

In 1994, with Deniz Aslan founded DS Architecture to focus on landscape architecture and documentation. She experimented with the survey methods developed by DS to use 3D optical measurements in a format that can be integrated into architectural drawings.

Some other projects are:

\_Survey of Uçhisar Houses project with Ayşe Orbay and Feyza Cansever and restoration of two plots with Feyza Cansever (1999);

\_Survey, restitution, restoration, re-use and environmental design Project of Kadıköy Hasanpaşa Gasworks of the Greater Municipality of Istanbul, under the direction of ITU Department of Restoration (2000-01, 2014-on going);

\_Survey and restitution of Santral-Istanbul Science and Art Museum(2004);

\_Preparation of drawings for the 2006 excavations of Zeugma Ancient City (under the direction of Kutalmış Görkay);

\_Documentation, conservation, and repair projects of archaeological remains at Antakya Museum-Hotel (2011-18).

\_\_Documentation, conservation, and repair projects of archaeological remains of an Odeon Building in Aizanoi, Çavdarhisar, Kütahya (2017).

As guest, Aslan taught measurement methods as part of preservation classes at Istanbul Bilgi University, Faculty of Architecture during the fall semester of 2013, and shared her experience as a guest speaker Istanbul MEF University, Faculty of Architecture, in 2017.
